WHY SHOULD I SPONSOR A CHILD?

By giving them a different perspective that helps ensure that they break free from generational poverty and lead to fulfilling lives. Sponsored children have a better chance of finishing their education. Many children are forced to drop out of school early as their parents are unable to afford ongoing school fees or they are required to work to supplement the family's income.

Education is crucial in combating poverty, investing in a child's education ensures that by extension, you are sponsoring their families, you have invested in their future and in so doing you have improved societies and communities.

A partnership between educational institutions and corporates ensures that corporates remain relevant in changing lives as it not only addresses the child's immediate needs but also builds self respect and self esteem.

To humanize corporates, so that the values of Ubuntu are seen and translated as a company, when a child is sponsored, a face and a name is put in the fight against poverty.

Sponsoring a child is not just giving money, it is giving hope.

“

EDUCATION
THE PASSPORT
TO THE FUTURE,
FOR TOMORROW
BELONGS TO THOSE
WHO PREPARE FOR
IT **TODAY** ”

“ **YOUR ATTITUDE WILL DETERMINE YOUR ALTITUDE.** ”

The money makes a difference, but the knowledge that someone cares enough to invest in them means a lot to the child. In the harshest of living conditions, such hope makes a difference.

We have all heard reports about the ills in our societies, the challenges of crime and unemployment that are before us. But we can all make a difference and we can make a mark in the lives of children so that they do not continue with the inequalities of the society we live in. If you think education is expensive, try ignorance. Remember, teachers change the world, one child at a time and education is the most powerful weapon which you can use to change the world.
